DISCLAIMER

ETFscale.com is a website whose goal is to educate general public about the benefits of low-cost diversified portfolios using index funds. ETFscale is not a financial advisor. Please consult a registered financial advisor to discuss your investment goals and/or your specific financial situation.

ETFscale.com is not a financial advisory firm. The services provided here are of educational purposes only and are meant to educate investors regarding investment choices. Please consult a certified financial planner or registered investment advisor to discuss your investment goals and possible plans. This site is for the education of the investors only and should not be used as a substitute for investor's own judgment.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS, AND ANY EXPECTED RETURNS OR HYPOTHETICAL PROJECTIONS MAY NOT REFLECT ACTUAL FUTURE PERFORMANCE. FURTHERMORE, PAST RETURNS MAY REFLECT THE PERFORMANCE OF ASSETS FOR A FINITE TIME, OR DURING A PERIOD OF EXTREME MARKET ACTIVITY. ALL INVESTMENTS INVOLVE RISK AND MAY LOSE MONEY. There can be no assurance that an investment mix or any projected or actual performance shown on the Site will lead to the expected results shown or perform in any predictable manner. It should not be assumed that investors will experience returns in the future, if any, comparable to those shown for illustrative purposes only on the site.

ETFs typically include embedded expenses that may reduce their net asset value, and therefore directly affect performance and indirectly affect a portfolio's performance or an index benchmark comparison. These expenses may include management fees, custodian fees, and legal and accounting fees. ETF expenses may change from time to time at the sole discretion of the issuer. ETF tracking error and expenses may vary.

Furthermore, ETF performance may not exactly match the performance of the index or market benchmark that the security is designed to track because 1) the security incurs expenses and transaction costs not incurred by any applicable index or market benchmark; 2) certain securities comprising the index or market benchmark tracked by the ETF may, from time to time, temporarily be unavailable; and 3) supply and demand in the market for the ETF and/or for the securities held by the ETF may cause the security's shares to trade at a premium or discount to the actual net asset value of the securities owned by the security.

The user of the site should be aware that we have taken no commissions or any other kind of financial benefits for choosing the ETFs on the site. When possible we have chosen reasonably low cost ETFs to construct these educational portfolios. Users may find cheaper ETFs elsewhere.
